

## Discrete Mathematics – Test2

1. Please show that  $\langle \mathbb{Z}, + \rangle$  is infinite cyclic group, and  $-1$  is a generator of  $\mathbb{Z}$ .
2. The group  $\langle \mathbb{Z}_6, +_6 \rangle$ ,  $B_1 = \{2\}$ ,  $B_2 = \{2, 3\}$ . To compute  $\langle B_1 \rangle$  and  $\langle B_2 \rangle$ .
3. Let  $G$  is a group,  $H \leq G$ , then  $a \in Hb \Leftrightarrow ab^{-1} \in H \Leftrightarrow Ha = Hb$ .
4.  $\sigma = \begin{pmatrix} 1 & 2 & 3 & 4 \\ 4 & 3 & 1 & 2 \end{pmatrix}$  and  $\tau = \begin{pmatrix} 1 & 2 & 3 & 4 \\ 2 & 3 & 4 & 1 \end{pmatrix}$ . To compute  $\sigma\tau$  and  $\tau\sigma$ .
5. Consider the cycles  $(25143)$  and  $(462)$ . To compute  $(462)(25143)$ .
